

Equity Market Return Expectations for Saudi Arabian TASI Index, 2020-2024

Marmore Long-Term Capital Market Expectations

What is Marmore Long-Term Capital Market expectations?

Marmore's Capital Market Expectations are views of equity market growth and returns over the medium term (5 years) using internationally accepted economic and investment methodologies.

How do we arrive at it?

We have developed our own proprietary model to estimate the returns. Our expectations are arrived from the analysis of both historical and forward-looking equity market indicators.

What does it cover?

We provide 5-year return expectations for Saudi Arabia's equity market.

What is the frequency of updates?

We provide an update of these expectations every six months.

Where can it be used?

Our data enables investment managers and investors to judiciously plan their asset allocation strategies and achieve investment portfolios optimization of the risk- return mix.
